EDUCATION

University of Waterloo
BASc Computer Engineering
September 2013 - April 2018

WORK EXPERIENCE

Consultant, CAPGEMINI CANADA INC. (MANULIFE)

(Node.js | ReactJS | Redux | Java) - October 2018 - Present

- Undertook the role of technical lead and managed a team of six developers for a UI reskinning project at Manulife
- Developed a unified customer login portal for all Manulife products
- Implemented a microservice which seamlessly authenticates users between legacy and modern applications using Spring Boot
- Improved unit test coverage to 75% and enforced continuous integration rules in development pipelines

Full Stack Developer, GO UBIQ INC. (YC S17)

(ReactJS | Redux | SASS) - June 2018 - October 2018

- Developed a new web conferencing application using React and Redux
- Integrated Twilio call API for VOIP and dial out capabilities
- Implemented user feedback over iterations to improve user interface and overall experience

Software Developer, OPENTEXT CORPORATION

(Python | Node.js | AngularJS) - January 2017 - December 2017

- Maintained desktop application for cloud-based content management system
- Updated desktop client with a new sharing permission level of a cloud-based content management system
- Enhanced synchronization engine to improve accuracy of image overlays in Windows Explorer and Mac Finder

Programmer Analyst, ONTARIO TEACHERS' PENSION PLAN BOARD

(C# | AngularJS | SQL) - September 2015 - December 2015

- Developed a service with a RESTful API to establish communication between the database and the front-end of a web application
- Enhanced the in-house report management system using SQL stored procedures
- Implemented an interactive training module using AngularJS backed by a SOAP service

PROJECTS

Affine Weddings - github.com/c2khanna/affine_wedding - affineweddings.com

(ReactJS | Node.js | AWS) - October 2017

- A single-page application website for a local wedding planning company
- Implemented inquiry form by incorporating Amazon Web Services' Lambda functions and Simple Email Service
- Deployed website using AWS S3 and Route53

Can You Even Uber - github.com/c2khanna/Uber - c2khanna.github.io/Uber/

(AngularJS | HTML5 | CSS) - March 2016

- A web application that helps you determine your eligibility to be an Uber driver
- Developed reusable Angular directives to use on the single page application

Not For The Taste - github.com/c2khanna/lcbo-sales

(Node.js | AngularJS | MongoDB | SASS) - January 2016

- A Node.js application that queries the LCBO product list to extract all current items on sale
- Responsive frontend design written with AngularJS and Angular Material
